Project Title: Internships Management System

Brief Description:

The Internships Management System is a web-based application designed to connect students and companies through internship opportunities. Companies can post internships, manage applications, and update or delete listings, while students can register, browse internships, apply for positions, and track their applications. The system provides an admin interface to manage users, internships, and overall platform activities

Technology usage (Eg: NodeJS, ReactJS):

Frontend: ReactJS, TailwindCSS
Backend: Node.js, Express.js
Database: MongoDB
